

Plastic Flooring

High-tech injection molding from virgin quality Polypropylene Copolymer creates durable, long-lasting plastic flooring.

Available in multiple grid configurations and sizes, Hog Slat's plastic flooring adapts to any building scheme.

Chess Nursery

Self-cleaning, 3/8" slots arranged in a multi-direction pattern give nursery pigs optimum traction. Sturdy design supports wider spans, reducing support beam costs. Suitable for pigs up to 130 lbs.

Swing Sow Sections

Combine Swing series with Rubin for complete farrowing floors. Choose from the various types of Swing sections for sow comfort; 5 & 10% solid for shoulders areas along with soft and GR series for lying and traction.

Rubin Creep

Rubin design offers an excellent combination of traction, comfort, and cleaning for small piglets. Available in multiple sizes with 3/8" slot width.

DUO Beam Supports

Delta Beam's edge profile interlocks with the flooring sections for extra security. Corrosion resistant fiberglass construction and triangular shape avoid manure buildup while furnishing high load bearing and buckling stability.

DUO Support Leg Set

Provides intermediate support for longer beam installations.

Modular Plastic Farrowing Floors

Modular components are configured to match almost any size of farrowing layout. Choose from durable cast iron or Swing plastic center sections paired with interlocking creep sections.

Cast Iron Center Section

Smooth edge openings reduce sow injuries. Longer sizes require only two sections per crate preventing sows from moving a section out of place.

Creep Panels

Offers an excellent combination of traction, comfort, and cleanliness for small piglets. Available in a variety of sizes with 3/8" slot width.

Center sections dovetail with creep panels and lock on to the DUO fiberglass supports. End cap pedestal seals and stabilizes supports.

Hog Slat offers a variety of interlocking cast flooring sizes. Hog Slat cast flooring is designed to fit the most common sized crates by utilizing only two pieces of cast flooring, as opposed to many other types which require up to 3-5 pieces to complete the flooring for common crate sizes. Fewer cast pieces aid in the integrity of the floor.
